

E-Learning Platform Summary Report

Key Insights

- **Revenue Drivers**

Programming courses generate the highest revenue due to premium pricing (₹2499–₹3999).

Business and Design categories contribute steady mid-level revenue.

- **Top Performing Courses**

Courses like *AI Driven Data Analytics* and *Advanced Java Development* show strong demand.

High-priced courses are still selling well users value quality over price.

- **Customer Behavior**

Many learners purchase across multiple categories.

Indicates strong potential for cross-selling and bundled offers.

- **Category Performance**

Programming Highest revenue and demand

Marketing High volume, low revenue (low pricing)

Personal Development Lowest engagement

- **Geographic Trends**

Majority of users are from India.

Secondary markets include UAE, Canada, and Australia.

- **Unused Assets**

Some courses have zero purchases underperforming or poorly marketed.

Recommendations

- **Focus on High-Performing Categories**

Invest more in Programming (ads, advanced courses, bundles)

- **Upsell & Cross-Sell**

Recommend related courses to multi-category learners

- **Improve Low-Performing Courses**

Revise content, pricing, or marketing strategy

Consider removing or relaunching weak courses

- **Optimize Pricing**

Increase pricing or bundle Marketing courses

Maintain premium pricing for high-demand courses

- **Expand International Reach**

Target UAE, Canada, Australia with localized campaigns

- **Boost Retention**

Introduce loyalty programs, discounts, or memberships

Conclusion

- Programming courses are the primary revenue driver
- Cross-category learners present the biggest growth opportunity
- Immediate improvements needed for underperforming courses
